

November 28, 2018

Global student mobility is on the rise. Today, about 5 million students are studying outside of their home countries. The figures represent an increase of 67% from the 3 million students studied abroad in 2005. It represents a 7% annual growth.

Asia is the heart of study abroad student flows. It is the top originating region of global foreign student populations. Asia is a prime global source of talents. Asian students account for 42% of total global foreign students. Aspiring for global recognition in academic excellence, visibility and rankings, Asian universities have been enthusiastic in reaching out to global academic communities.

Thailand is becoming more and more attractive to students from abroad for study abroad experiences. It is estimated that there are 32,000 foreign students in Thailand annually. The quality of teaching has improved remarkably over the years and Thailand has become one of the top study abroad destinations in South East Asia.

Asia Exchange's concept works well. Over the years, Asia Exchange coordinated students from many countries to study at Siam University.

I warmly recommend Asia Exchange's services to students interested in study abroad at Siam University.

Sincerely,
